

I 100 N -PE is a voltage switching SPD providing a single mode of protection, typically installed in TT-systems between neutral conductor $N$ and protective earth PE, where connection type CT2 ( $1+1$ or $3+1$ ) is required according to
HD 60364-5-534, e.g. in the Main Distribution Board (MDB), with the following features and benefits:

- Impulse test classification: Test class I and II according to IEC 61643-11 Ed. 1 (2011-03) and Type 1 and 2 according to EN 61643-11 (2012-10);
- I 100 N-PE is a Gas Discharge Tube (GDT) based SPD, for the protection of low voltage installations and equipment against direct and indirect lightning effects;
- Impulse discharge current of $100 \mathrm{kA} \mathrm{10/350} \mathrm{\mu s;}$
- Nominal discharge current of $100 \mathrm{kA} 8 / 20 \mu \mathrm{~s}$;
- The special housing is designed for "Pollution Degree 3";
- To be combined with IA 25 or L 25/100 230 ff.
